Rebecca Fielding

Creative Artworker

Profile

As a professional and conscientious designer, I strive and aspire to obtain a creative artworker position within an environment where I can contribute my passion for visual communication and hone my skills. My strengths include digital and traditional illustration, layout and design as well as editing and compositing for film and stop-motion animation. I am keen to expand my knowledge and skills across all of these areas. I am self-motivated, pay attention to detail and able to adapt to many styles as well as give projects my own flair.
